

MUHAMMAD USMAN

Flutter Engineer · Remote (Gulf / EU time-zone overlap)

✉ ottomandevloper@gmail.com 📞 +92 317 7794553 🌐 [GitHub](#) [LinkedIn](#) [pub.dev](#) [Portfolio](#)

SUMMARY

Flutter engineer with 5+ years shipping production apps to the App Store and Google Play across health, e-commerce, delivery, fintech, and crisis support. Built a streaming app that reached 600K+ users, BLE-connected health and hardware apps, and offline-first apps with background sync. Publisher of Dart packages on pub.dev. Works well with founders and cross-functional teams from requirements through store release.

EXPERIENCE

BelnMedia – Nmo AI

Jul 2024 – Sep 2026

Senior Flutter Developer

Remote · Kuwait

- Built core features of Nmo AI, an AI-powered fitness and health app for the MENA market, working in a cross-functional international team.
- Implemented **Bluetooth Low Energy (BLE)** sync of real-time health metrics from scales and heart-rate monitors into the app.
- Added **Gemini-based personalization** for health insights and adaptive fitness tracking; contributed to Flutter architecture decisions for long-term maintainability.

Ottoman Coder – Freelance

Nov 2020 – Present

Senior Mobile App Developer

Upwork · Malt

- Delivered production apps for clients in Pakistan, India, Saudi Arabia, France, Australia, Thailand, and Laos across e-commerce, healthcare, fintech, and social products.
- Audited and fixed **20+ client codebases** (Gradle conflicts, Firebase misconfigurations, performance issues) and brought them to store release.

SD Cold Logistics & YouShopper, Inc.

Nov 2022 – May 2023

Flutter Developer (Contract) – iOS & Android

Remote

- Shipped **three Flutter apps** (Customer, Seller, Delivery) for a multi-vendor marketplace, each with its own UX flow and state management.
- Coordinated a **zero-downtime backend migration** for the Seller app with backend engineers.

Fulfil Supply Chain

Sep 2021 – Mar 2023

Flutter Developer (Contract) – iOS & Android

Remote · Vientiane, Laos

- Led the rebuild of a cross-border e-commerce app with **OpenCart API** integration for real-time inventory and order sync, plus **Firestore Auth & FCM** for login and order notifications.
- Profiled and optimized startup and screen transitions.

HomyKSA

May 2022 – Oct 2022

Flutter Developer (Contract)

Remote · Saudi Arabia

- Built a home-services marketplace (real-time order matching, payments, worker management) and shipped the **MVP in ~21 days to App Store and Google Play**.

NOTABLE PROJECTS

Legend TV – Streaming App | Flutter, Firebase, REST APIs, AdMob

Self-Built

- Designed, built, and launched a streaming app that reached **600K+ users** across Pakistan, India, and Saudi Arabia; **ranked #1** in its Play Store category for **5 consecutive months**.
- Implemented ad (AdMob) and subscription monetization, generating **\$20,000+ in year one**.

Alongside: Suicide Prevention | *Flutter, Hive, Supabase*

Play Store

- Built an **offline-first** crisis-support app with safety planning, region-aware crisis-line access, and check-ins; **Hive** local storage with background **Supabase** sync, guest access, and **23 languages**.

AlcoPass – Connected Breathalyzer | *Flutter, BLoC, universal_ble, Firebase*

Client · France

- Built a **BLE** companion app for the AlcoPass C1: pairing, warm-up/blow/analyze state machine, and parsing 16-byte frames into BAC readings; localized in **5 languages** with Firestore-logged results.

HelloBiller: Ledger Book Khata | *Flutter, offline-first, reporting*

Play Store

- Developed an offline-first small-business ledger with multi-store and multi-currency support, receipt attachments, and shareable **PDF / Excel / CSV reports**.

OPEN SOURCE (PUB.DEV)

tanquery | *Dart, caching*

Active

- TanStack Query-style data caching for Dart and Flutter: stale-while-revalidate, background refetch, mutations, infinite queries, plus Flutter builders and a devtools cache inspector.

vision_ai | *MediaPipe, ML Kit, TFLite*

On-Device AI

- On-device hand-gesture and facial-emotion detection for Flutter at **25–30 FPS with zero cloud calls**.

firebase_cloud_messaging_dart | *FCM HTTP v1*

Active

- Pure-Dart FCM sender (Flutter, Serverpod, CLI, Cloud Run) with Application Default Credentials, structured errors, and automatic retries.

TECHNICAL SKILLS

Core: Dart, Flutter (Android / iOS / Web / Desktop)

State Management: BLoC / Cubit, GetX, Provider

Backend & Data: Firebase (Firestore, Auth, FCM, Storage, Functions), Supabase, PostgreSQL, Hive, Isar, SQLite

APIs & Integrations: REST, OpenCart, OneSignal, AdMob, AppLovin

Hardware & AI: BLE (*universal_ble, flutter_blue_plus*), Gemini, MediaPipe, Google ML Kit, TFLite

Other: Kotlin & Swift (platform channels), PHP / Laravel (API integration), JavaScript, SQL, Git, Figma, Postman, App Store + Play Store deployment

EDUCATION

Virtual University of Pakistan

B.S. Computer Science (in progress)

Expected 2029

Remote
