SUMMARY

Senior Flutter / Mobile Engineer with 5+ years shipping **50+ production apps** across Android, iOS, Web, and Desktop. Solo-built a streaming platform that reached **600K+ users**, ranked **#1 in its Play Store category for 5 months**, and generated **\$20K+** year-one revenue. Currently building an AI fitness app with **Gemini AI** and **BLE device connectivity** at BeInMedia. Publishes **13 packages** on pub.dev; owns architecture, store releases, and founder-facing delivery end to end.

EXPERIENCE

BeInMedia – Nmo AI

Jul 2024 – Present

Senior Flutter Developer

Remote · Kuwait

- Building **Nmo AI** — an AI-powered fitness and health application targeting the MENA market.
- Integrated **Bluetooth Low Energy (BLE)** to sync real-time health metrics from fitness devices (scales, heart rate monitors) directly into the app.
- Implemented **AI-driven personalization** for health insights and adaptive fitness tracking (Gemini and related model inference).
- Drove Flutter architecture decisions within a cross-functional international team for long-term maintainability.

Ottoman Coder – Freelance

Nov 2020 – Present

Senior Mobile App Developer

Upwork · Malt

- Delivered **50+ production-grade apps** for international clients across Pakistan, India, Saudi Arabia, Australia, Thailand, and Laos — e-commerce, healthcare, fintech, and social.
- Audited and optimized **20+ client codebases** (Gradle conflicts, Firebase misconfigurations, performance) into shippable products.
- Product-led with founders: business requirements → technical roadmaps and scalable MVP architectures, through store submission.

SD Cold Logistics & YouShopper, Inc.

Nov 2022 – May 2023

Senior Flutter Developer – iOS & Android

Remote

- Architected and shipped **three separate Flutter apps** for the YouShopper multi-vendor platform: Customer, Seller, and Delivery — each with independent UX flows and state management.
- Engineered a **coin-based monetization system** with YouTube Data API v3 and OneSignal push for real-time engagement.
- Coordinated a **zero-downtime backend migration** for the Seller platform with backend engineers.

Fulfil Supply Chain

Sep 2021 – Mar 2023

Senior Flutter Developer – iOS & Android

Remote · Vientiane, Laos

- Spearheaded the rebuild of a cross-border **e-commerce application** integrating **OpenCart API** for real-time inventory and order sync across countries.
- Integrated **Firebase Auth & FCM** for authentication and order-update push notifications.
- Conducted performance profiling that measurably reduced app startup and screen transition times.

HomyKSA

May 2022 – Oct 2022

Senior Flutter Developer

Remote · Saudi Arabia

- Shipped a **home-services marketplace** for Saudi Arabia — real-time order matching, payments, and worker management flows.

- Delivered the **MVP** in **~21 days** and published to **App Store and Google Play**.

NOTABLE PROJECTS

Legend TV – Streaming Platform | *Flutter, Firebase, REST APIs, Admob*

Self-Built

- Independently designed, built, and launched a **Urdu-dubbed streaming platform** reaching **600,000+ active users** from Pakistan, India, and Saudi Arabia.
- **Ranked #1** in its Play Store category for **5 consecutive months**; generated **\$20,000+ in revenue** via ads and subscriptions in year one.

LifeLink | *Flutter, BLoC, Google Gemini Pro, Firebase, fl_chart*

Play Store

- Canada-focused crisis-support app: **province-aware directory of verified crisis lines** (988, Hope for Wellness, BC networks) plus daily sleep / diet / stressor tracking with charts.
- Integrated **Google Gemini Pro** for supportive poetry, **guard-railed to fail safe**; offline-resilient via HydratedBloc.

AlcoPass – Connected Breathalyzer Station | *Flutter, BLoC, universal_ble, Firebase*

Client · France

- Built a **BLE** companion for the **AlcoPass C1** — pairing over `universal_ble`, warm-up/blow/analyze state machine, parsing 16-byte frames into BAC (g/L blood, mg/L air) vs legal limit.
- Localized in **5 languages** (FR/EN/DE/ES/IT) with Firestore-logged results; venue self-test stations across Europe.

Chronos | *Flutter Web, Provider, CustomPainter*

Live Demo · GitHub

- Scroll-as-timeline Flutter Web journey across 9 eras — **30+ CustomPainters**, single Ticker, visibility-gated rebuilds, **~60 fps**, zero image/Lottie assets.
- Strong **Flutter Web performance** proof: frame-budgeted painting and RepaintBoundary isolation per era.

BabyPig | *Flutter Web, Provider, flutter_svg*

Live Demo · GitHub

- Production-grade **Flutter Web** landing page: scroll-triggered reveals, glassmorphism, animated counters, 3-breakpoint layouts — **zero external animation packages**.
- Frame-batched scroll processing, centralized observer pattern, and RepaintBoundary isolation for smooth web performance.

OPEN-SOURCE CONTRIBUTIONS (PUB.DEV)

tanquery | *Dart, Flutter adapters, caching*

Active · v0.8

- TanStack Query–style caching for Dart: stale-while-revalidate, background refetch, mutations, infinite queries — plus **tanquery_flutter** builders and **tanquery_devtools** cache inspector.

vision_ai | *Dart, MediaPipe, Google ML Kit, TFLite*

On-Device AI

- On-device computer vision for Flutter — hand gestures (13 / 21 landmarks) and facial emotion (7 + blink/nod/attention) at **25–30 FPS with zero cloud calls**, plus companion UI overlays.

firebase_cloud_messaging_dart | *Dart, FCM HTTP v1, Google ADC*

Active

- Pure-Dart FCM sender (Flutter, Serverpod, CLI, Cloud Run) with Application Default Credentials, structured errors, and automatic retries — no intermediate server required.

firebase_admin_sdk | *Dart, Firebase Admin*

Name credit

- Authored **early versions** of `firebase_admin_sdk` on pub.dev. Google’s Firebase publisher later took the **package name only**; credited as original author. Current official package lineage is **not** my maintained codebase.

TECHNICAL SKILLS

Core: Dart, Flutter (Android / iOS / Web / Desktop)

State Management: BLoC / Cubit, GetX, Provider

Backend & Databases: Firebase (Firestore, Auth, FCM, Storage, Functions), Supabase, PostgreSQL, Hive, Isar, SQLite

APIs & Integrations: REST, FCM HTTP v1, YouTube Data API v3, OpenCart, OneSignal, AdMob, AppLovin

Hardware: BLE (universal_ble, flutter_blue_plus), health-device sync

AI & Product: Gemini AI, MediaPipe, Google ML Kit, TFLite, on-device computer vision

Supporting Languages: Kotlin & Swift (platform channels / basics), PHP / Laravel (API integrate & review), JavaScript, SQL

Tools: Figma, Postman, Git, GitHub, Bitbucket, Google Cloud, **App Store + Play Store** deployment

EDUCATION

Virtual University of Pakistan

Bachelor of Computer Science – In Progress

Feb 2025 – Aug 2029

Remote
